PRINCE INDUSTRIES

What can be processed?

- Chicken
- Turkey
- Fish
- Shellfish
- Red Meats

Maximizing Yield, Minimizing Waste

OUR PROCESS

Mechanically Separated Meat

MSM (also known as MDM and MRM) is a sustainable and efficient way of turning raw material into high-quality protein for a variety of uses.

Raw Material

Separated Calcium

MSM/MDM

Prepared for Mixer/Blender

Preparation

Raw materials are loaded into the machine for processing.

Separation

Our technology separates meat from bone, collecting soft tissues.

Refining

The separated meat is refined into a consistent texture, ensuring it meets industry standards.

Quality Control

Product is ready for processing to befome:

Chicken Nuggets • Hot Dogs • Bologna • Sausages
Meat Patties • Bone Broth • Pet Food • And More

Why MSM?

By efficiently extracting usable protein, Prince helps processors meet market demands while minimizing environmental impact, making it a smarter choice for businesses seeking both economic and sustainable advantages.

Our machines are designed to handle volumes ranging from small-scale operations to large-scale production, with **capacities from 400 to 40,000 lbs per hour**. These versatile machines excel at both **deboning and grinding**, consistently delivering the highest quality results.
