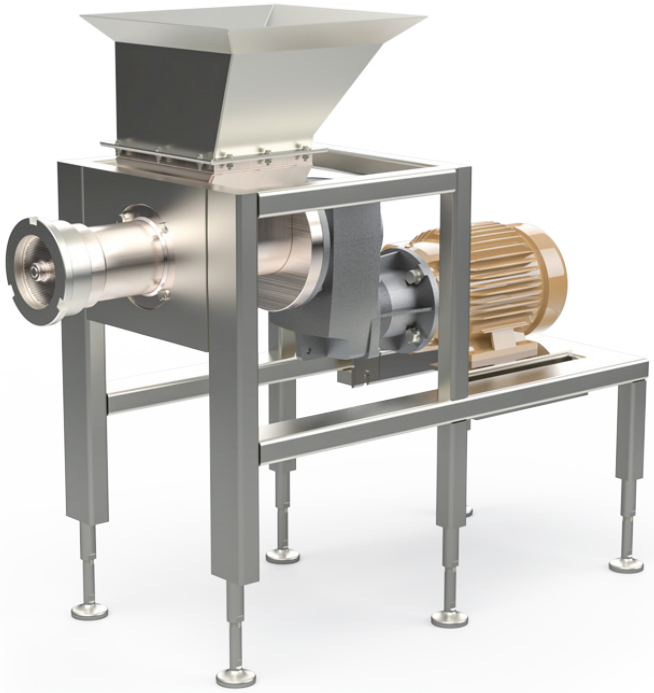
PRINCE INDUSTRIES

Model 6 Grinder



The **Model 6 Grinder** is Prince's first product designed specifically for meat that has already been manually separated. For food processors seeking to increase profit and eliminate waste, this grinder further processes product scraps that might have gone toward lower-margin uses into a higher profit-generating ground meat product.

The precisely crafted unit features a small 3×5 feet footprint and takes just five minutes to set up. While conceived as a stand-alone unit, those looking to add to existing equipment can attach the grinder to Prince's existing combination deboners.

The Model 6 Grinder is easy to maintain and clean and can process both ground chicken and turkey.

Capacity per Hour:	5,000 lbs. / 2,267+ kgs.
Sidemount Floor Space:	36" x 60" / 76.2 cm x 152.4 cm
Horsepower:	15-20 hp
